

MINECRAFT HOUR OF CODE

Students of all ages can learn to code in Minecraft: Education Edition for free!

Travel back in time and learn basic coding concepts in this year's Hour of Code lesson! Students will see that computer science is truly everywhere and for everyone as they connect with great innovators and inventions in science, architecture, music, engineering, and more.

Choose to complete activities using block-based coding with MakeCode or text-based with Python for a challenge!

It doesn't matter if you're new to Minecraft or new to coding – the Minecraft Hour of Code makes coding accessible and fun.
