

MINECRAFT HOUR OF CODE

Students of all ages can learn to code in Minecraft: Education Edition for free!

Learn basic coding concepts to bring two villages together, plus essential 21st century skills like problem solving and critical thinking!

Players will experience empathy and compassion for their neighbors, learn about cooperation and inclusion, and embrace the diversity that makes us all uniquely special. Choose to complete activities using block-based coding with MakeCode or text-based with Python for a challenge!

It doesn't matter if you're new to Minecraft or new to coding – the Minecraft Hour of Code makes coding accessible and fun.
