

Task Card

Renewable Energy

You might need:
Cards: 1, 2, 3,
4, 6, 11, 13, 29

Learning Objectives:

1. Students will gain an understanding about wind farms.
2. Students will be questioned on topics relating to wind farms.
3. Students will do mathematical conversions and learn about energy.
4. Students will complete a turbine that is out of order.

MINECRAFT

EDUCATION EDITION

1. Open world 5.15 – Renewable Energy (Wind Power)
2. Read the Book & Quill already in your hotbar.
3. Enter the building on your left side.
4. Go upstairs and read the boards containing information and examples.
5. Complete the questions contained in your Book & Quill and answer them using the provided answer sheet.
6. Your last task is to complete the out-of-service wind turbine on the opposite side of the wind farm.
7. Once you've added the 3 propellers to the last turbine, take a picture using the camera tool and export it using the portfolio tool.
8. Import your photo into the word document where specified.
9. Email your completed answer sheet containing the image export from Minecraft: Education Edition to your teacher for marking.
