

**List of possible questions you can ask students as they work on their Sustainable Development Goal Solutions to check for deeper understanding.**

1. In your own life how does this goal/target/problem apply?
2. Are there ideas you thought of that you decided not to build and why?
3. How much do you think this solution would cost? Should cost matter?
4. Do you think the solution you are building could help with any of the other 16 Sustainable Development Goals? Which ones and why?
5. If in teams. Did you disagree on anything and how did you resolve it?
6. Could your solution be used all over the world in every location? Why or why not?
7. Which location on Earth would be able to use your solution the best?
8. How do you plan on sharing this solution with your classmates? With the world?
9. If you had to work the rest of your life to solve one of the 17 goals, which goal would you want to work on? Why?
10. How does this goal or how do the SDGs relate to the class you are in right now?
11. Near the end. Do you think Minecraft allowed you to properly showcase your solution and understanding of the problem? How?
